

Your Health and Dental Insurance Policy

Veltora Health & Dental Individual and Family Plans: Essential, Plus and Complete

Policy wording | Series 1 | Effective September 1, 2026

This policy is issued by Veltora Life and Health Insurance Company. In this policy, "we", "us", "our" and "Veltora" mean Veltora Life and Health Insurance Company. "You" and "your" mean the policyholder named in your Policy Summary.

This policy, together with your Policy Summary and Schedule of Benefits, sets out the coverage we provide, the conditions that apply, and your rights and responsibilities. Please read it carefully and keep it with your records.

This policy contains a provision removing or restricting the right of the insured to designate persons to whom or for whose benefit insurance money is to be payable.

Your 30-day review period: if you are not satisfied with this policy, you may cancel it within 30 days of your effective date for a full refund of premiums paid, less any claims paid. See Section 6.4.

Signed on behalf of Veltora Life and Health Insurance Company at Toronto, Ontario.

A. Whitfield

President and Chief Executive Officer

R. Osei

Corporate Secretary

SAMPLE DOCUMENT. Veltora Insurance, Veltora Life and Health Insurance Company, and all names, contact details and form numbers in this document are fictional and were created for demonstration purposes. Any resemblance to a real company is coincidental.

1. Definitions

The words below have a specific meaning when they appear in this policy.

accident – A sudden, unforeseen event caused by something outside the body that results in bodily injury.

accidental dental injury – Damage to natural, healthy teeth caused by an external, direct blow to the mouth. Damage caused by biting or chewing, including on food or any object, is not an accidental dental injury.

anniversary date – The date each year that matches your effective date.

anniversary year – The 12-month period that starts on your effective date, and each 12-month period that starts on an anniversary date after that. Most annual maximums reset at the start of each anniversary year.

benefit period – For benefits that have a time-based limit (such as vision), the period that starts on the date of service of the first claim we pay for that benefit. When a benefit period ends, the next one starts with the next eligible claim.

biosimilar – A biologic drug that Health Canada has authorized as highly similar to an original (reference) biologic drug already sold in Canada.

coverage type – Single, Couple, Single parent or Family, depending on who is covered under your policy. Your coverage type is shown in your Policy Summary and affects your premium.

covered person – You and each dependent listed in your Policy Summary.

dental fee guide – The general practitioner dental fee guide published by the dental association of the province or territory where the service is provided, for the year the service is provided. For dental services received outside Canada, the fee guide for your home province or territory applies.

dependent – Your partner or a dependent child.

dependent child – Your or your partner's unmarried child (biological, adopted, step-child, or a child under your legal guardianship) who is: under age 21; or under age 25 and enrolled full-time at an accredited post-secondary institution; or any age, if the child became disabled before age 21 (or while a full-time student under age 25) and has remained continuously dependent on you for support.

dispensing fee – The professional fee a pharmacy charges to fill a prescription.

effective date – The date your coverage starts, as shown in your Policy Summary. For a dependent added later, the date that dependent's coverage starts.

eligible expense – A reasonable and customary charge for a service or supply that is covered under your plan, is medically necessary, and meets all of the terms of this policy.

evidence of insurability – Health and other information we may ask for to decide whether to approve an application, an added dependent or a change in coverage.

formulary – The list of drugs eligible for reimbursement under your plan. The Essential plan uses the Core Formulary; the Plus and Complete plans use the Standard Formulary.

generic drug – A drug that Health Canada has determined to be interchangeable with a brand-name drug.

government health plan – Any plan or program established or funded by a federal, provincial or territorial government that pays for health care, drugs, devices or services. This includes provincial health insurance plans, public drug programs, the Assistive Devices Program in Ontario, and workers' compensation boards.

health practitioner – A person who is licensed or registered, where the province or territory requires it, to provide the service, and who is acting within the scope of that licence. A health practitioner cannot be you or a member of your family.

hospital – A public general hospital licensed as a hospital in Canada. It does not include chronic care facilities, nursing or long-term care homes, rehabilitation centres, addiction treatment centres, convalescent homes or health spas.

medically necessary – Generally accepted in Canadian medical or dental practice as required to diagnose or treat an illness, injury or condition, and not experimental, primarily cosmetic, or mainly for convenience.

partner – The person you are legally married to, or have lived with in a conjugal relationship for at least 12 consecutive months. You may cover only one partner at a time.

policyholder – The person who applied for and owns this policy.

Policy Summary – The document we send when your policy is issued, and again after any change, that lists your plan, coverage type, covered persons, effective date, billing date, premium and any individual exclusions.

preauthorization – Our written approval, required before certain drugs, services or supplies are eligible for reimbursement.

pre-treatment estimate – A detailed estimate of proposed dental treatment, including procedure codes and fees, sent to us by your dental provider before treatment starts.

reasonable and customary – The amount we consider typical for a service or supply in the area where it is provided, based on fee guides, provider charges and manufacturer prices. We reimburse the lower of the actual charge and the reasonable and customary amount.

reimbursement percentage – The share of an eligible expense we pay, as shown in your Schedule of Benefits. You pay the rest.

Schedule of Benefits – The document titled "What's Covered?" that shows, for each plan, the benefits included, reimbursement percentages, maximums, frequency limits and waiting periods.

waiting period – The length of time a covered person must be continuously covered for a benefit before that benefit becomes payable.

2. How your policy works

2.1 Who can be covered

To apply for and keep this policy, the policyholder must be:

- At least 18 years old;
- A resident of Canada; and
- Covered by the government health insurance plan of their province or territory of residence.

Each dependent must also be a resident of Canada and covered by a government health insurance plan.

A person can be covered under only one Veltora individual health and dental policy at a time. If a second policy is issued by mistake, we will cancel the later policy and refund its premiums.

2.2 Dependents

You may cover your partner and your dependent children, as defined in Section 1. A few things to know:

- You may cover only one partner at a time.
- We will send you a notice at least 30 days before a dependent child is due to stop qualifying because of age. Their coverage ends at the end of the billing period in which they stop qualifying.
- A child who stops qualifying because of age may apply for their own Veltora health and dental policy within 60 days of their coverage ending, without providing evidence of insurability. Their maximums and waiting period credit carry over to the new policy.
- It is your responsibility to tell us when a dependent no longer qualifies. See Section 6.10.

2.3 Newborns and newly adopted children

If you add a newborn or newly adopted child within 31 days of their birth or adoption placement, they are covered from their date of birth or placement, with no evidence of insurability required. If you tell us after 31 days, we may ask for evidence of insurability and coverage starts on your next billing date after we approve it.

2.4 Québec residents

Québec residents must be registered with the public prescription drug insurance plan administered by the Régie de l'assurance maladie du Québec (RAMQ), unless they are covered under a group drug plan. This policy supplements RAMQ coverage; it does not replace it. Drug claims must be submitted to RAMQ first. For drugs covered by RAMQ, we reimburse the amount RAMQ does not pay, including the deductible and coinsurance, up to 100%. For drugs not covered by RAMQ, your plan's reimbursement percentage applies.

2.5 When coverage begins

Coverage starts at 12:01 a.m. local time in your province or territory of residence on the effective date shown in your Policy Summary. We will email you a confirmation when your coverage begins.

2.6 When coverage ends

Your policy, and the coverage of every covered person, ends on the earliest of:

- 11:59 p.m. on the last day of the billing period in which we receive your cancellation request, or a later date you choose (see Section 6.5);
- The date the policyholder dies, subject to Section 2.7;

- The end of the last period for which premium was paid, if premium is still unpaid at the end of the grace period (see Section 6.3);
- The date the policyholder no longer meets the eligibility requirements in Section 2.1; or
- The date we void the policy because of fraud or misrepresentation (see Section 7.2).

A dependent's coverage also ends on the date they no longer qualify as a dependent, or on the effective date of their removal from the policy.

2.7 If the policyholder dies

If the policyholder dies and a partner is covered, the partner becomes the new policyholder. Coverage continues for the remaining covered persons with no break, and their maximums, benefit periods and waiting period credit carry over. If there is no covered partner, a covered dependent child aged 18 or older may become the policyholder. If no one continues the policy, it ends the day after the policyholder's death and we refund any premium paid for the period after that date.

3. Your benefits

3.1 How benefits are paid

This policy describes every benefit available under the Veltora Health & Dental plans. **Not every benefit is included in every plan.** Your Schedule of Benefits shows which benefits your plan includes, the reimbursement percentage for each, and any dollar maximums, frequency limits and waiting periods.

Unless stated otherwise:

- Maximums and frequency limits apply to each covered person separately.
- Annual maximums apply per anniversary year.
- We reimburse eligible expenses only after any amount payable by a government health plan.
- We apply your plan's reimbursement percentage to the eligible expense, up to any per-visit or annual maximum.
- Each benefit is also subject to the general exclusions in Section 4.

3.2 Waiting periods

Some benefits are payable only after a covered person has been continuously covered for that benefit for a set length of time:

- **Major dental services** (Plus and Complete plans): 12 months.
- **Orthodontics** (Complete plan): 24 months.
- **Hospital accommodation for pregnancy or childbirth** (Plus and Complete plans): 12 months.

Each covered person's waiting period starts on their own effective date. When you upgrade to a plan that adds or increases one of these benefits, a new waiting period applies to the added or increased portion only (see Section 6.7).

3.3 Prescription drugs

What is covered

We cover drugs that:

- Legally require a prescription in your province or territory;
- Are prescribed by a physician, nurse practitioner, dentist or pharmacist, where they are authorized to prescribe;
- Have a Drug Identification Number (DIN) from Health Canada;
- Are listed on your plan's formulary; and
- Are dispensed by a licensed pharmacist.

We also cover certain products that do not legally require a prescription, when they have a DIN, are on your formulary and are dispensed by a pharmacist: insulin, diabetic needles, syringes and test strips, epinephrine auto-injectors, nitroglycerin, and certain vaccines. This benefit also reimburses deductibles and coinsurance under a public drug program, where permitted.

Formularies and generic substitution

- **Essential plan (Core Formulary):** a list of commonly prescribed, lower-cost drugs based on provincial public drug formularies. Generic drugs only.
- **Plus plan (Standard Formulary, mandatory generic substitution):** when an interchangeable generic drug exists, we reimburse up to the price of the lowest-cost generic, even if a brand-name drug is dispensed.

- **Complete plan (Standard Formulary):** brand-name drugs are reimbursed at your plan's reimbursement percentage even when a generic is available.

On the Essential and Plus plans, we will reimburse a brand-name drug when your prescriber documents an adverse reaction or treatment failure with the generic, using a Health Canada adverse reaction report and our medical exception form.

Biosimilars

If a biosimilar is available and your provincial drug program requires or supports switching to it, we reimburse the biosimilar rather than the original biologic. Your prescriber may request a medical exception.

Limitations

- We may add or remove drugs from a formulary at any time, including when a lower-cost drug with the same therapeutic effect becomes available.
- Some drugs need preauthorization. Check the drug lookup tool in your member portal. Preauthorization forms are sent to rxreview@veltora.example.
- Each fill is limited to a 100-day supply. After the first two fills of a maintenance drug, we may require 90-day fills to reduce dispensing fees.
- Opioids are limited to a 30-day supply per fill.
- A vacation supply of up to 6 months is available once per anniversary year with proof of travel.
- Dispensing fees are reimbursed up to the per-prescription limit in your Schedule of Benefits.
- If you are eligible for a public drug program (for example, a provincial program for children, seniors or people with high drug costs), you must claim there first.

Exclusions

We do not pay for:

- Drugs used mainly for lifestyle or cosmetic purposes, including erectile dysfunction, fertility, weight loss, hair growth or cosmetic skin treatment;
- Smoking cessation drugs and nicotine replacement products;
- Cannabis in any form;
- Vitamins, minerals, dietary and herbal supplements, natural health products, infant formula and meal replacements;
- Over-the-counter products not listed above;
- Drugs that are experimental, or used for a purpose Health Canada has not approved;
- Compounded products that don't meet our compounding guidelines;
- Vaccines for travel purposes, and fees for administering any injection or vaccine;
- Drugs given to you while you are a hospital inpatient.

3.4 Dental

Dental benefits are included in all plans. Which services are covered, the reimbursement percentage, the annual maximum and frequency limits depend on your plan.

How dental expenses are calculated

- Eligible expenses are based on the dental fee guide.
- Services provided by a dental specialist (for example, an endodontist or periodontist) are reimbursed up to the general practitioner fee guide amount for the same procedure.

- If your dental provider charges more than the fee guide amount, you pay the difference.
- Laboratory fees are reimbursed at the same percentage as the related procedure, up to 50% of the fee guide amount for that procedure.

Basic preventive and restorative services (all plans)

- Oral exams: complete exams, recall exams and emergency or specific exams, within the frequency limits in your Schedule of Benefits.
- X-rays: bitewing, full-mouth series and panoramic X-rays, within frequency limits.
- Cleanings: polishing and scaling once per recall period, up to your plan's annual scaling unit limit.
- Topical fluoride for covered persons under age 19.
- Sealants on permanent molars and space maintainers, for dependent children under age 16.
- Fillings, including amalgam (silver) and tooth-coloured fillings. Tooth-coloured fillings on premolars and molars are reimbursed up to the cost of an amalgam filling.
- Simple extractions of erupted teeth and residual roots.
- Anesthesia or sedation when performed with a covered surgical procedure.

Comprehensive services (Plus and Complete plans)

- Endodontics: root canal therapy, pulpotomy, pulpectomy, apicoectomy and emergency treatment of infection. Retreatment of a root canal on the same tooth is not covered within 24 months of the original treatment.
- Periodontics: scaling and root planing beyond your basic scaling limit, periodontal surgery and occlusal adjustment.
- Oral surgery: surgical extractions, including removal of impacted wisdom teeth, biopsies and removal of cysts.
- Denture maintenance: repairs, adjustments, and relines or rebases (once every 36 months, and not within 6 months of the denture being inserted).
- Occlusal (night) guards, **Complete plan only**: one per covered person every 36 months, when needed to protect teeth from grinding.

Major services (Plus and Complete plans; 12-month waiting period)

- Crowns and onlays, when a tooth cannot be restored with a filling. Crowns on molars are reimbursed up to the cost of a full-metal crown.
- Bridges, including abutment crowns and pontics, and complete or partial dentures.
- Repair and re-cementing of crowns, onlays and bridges.
- Replacement of a crown, onlay, bridge or denture only if the existing one is at least 60 months old and cannot be made serviceable, or was damaged by an accidental dental injury while covered.

A pre-treatment estimate is required before any major service.

Orthodontics (Complete plan only; 24-month waiting period)

- Covered for dependent children who are under age 19 on the date active treatment starts (the date braces or aligners are first placed).
- Includes diagnostic records, appliances (braces or clear aligners), adjustments and retainers after active treatment.
- Subject to a lifetime maximum per child, which does not reset if you change plans.
- Preauthorization is required. Your orthodontist must send us the treatment plan, including total cost and expected length of treatment.

We pay 25% of the approved treatment fee (at your plan's reimbursement percentage) when active treatment starts. We divide the rest into equal monthly payments over the approved length of treatment and pay them while coverage is in force. If coverage ends or the plan is changed to one without orthodontics, payments stop. If you pay your orthodontist a lump sum, we still reimburse on this schedule.

Pre-treatment estimates

Your dental provider must send us a pre-treatment estimate before starting any major service, any orthodontic treatment, or any course of treatment expected to cost more than \$600. We will tell you how much we will pay. An approved estimate is valid for 6 months. If we do not receive a required estimate, we may delay the claim or reimburse only the least costly professionally acceptable treatment.

Alternate benefit

When more than one professionally acceptable treatment is available, we reimburse the least costly one. You can still choose a more costly treatment, but you pay the difference.

Dental exclusions

We do not pay for:

- Dental implants and related services. Crowns, bridges and dentures supported by implants are reimbursed only up to the cost of the conventional equivalent under major services.
- Cosmetic services, including whitening of healthy teeth, veneers, and bonding for appearance.
- Replacing sound fillings (for example, amalgam with tooth-coloured) without new decay or fracture.
- Treatment or appliances for temporomandibular joint (TMJ) disorders, myofunctional therapy, or changes to vertical dimension, other than occlusal guards under the Complete plan.
- Restoring tooth structure lost to wear, abrasion, erosion or attrition, unless needed because of decay.
- Replacing lost, stolen or misplaced appliances, or duplicate appliances.
- Sedation or general anesthesia for comfort only.
- Missed appointments, and charges for completing forms.
- Services not listed in the dental fee guide.

3.5 Vision

What is covered

- Eye exams by a licensed optometrist or ophthalmologist, when not covered by your government health plan. Where your government plan covers eye exams, claim there first.
- Prescription eyeglasses (lenses and frames) and prescription contact lenses, prescribed by an optometrist or ophthalmologist and dispensed by a licensed optician, optometrist or ophthalmologist.
- Laser eye surgery performed by a licensed ophthalmologist.

Purchases from online retailers are eligible if the receipt shows the patient's name, the prescription, and an itemized list of what was purchased.

Benefit period

Vision maximums apply per benefit period of 24 months. For covered persons under age 18, the benefit period is 12 months.

Exclusions

- Non-prescription lenses and sunglasses, unless tinted lenses are prescribed to treat a medical condition;
- Safety glasses;

- Cases, cleaning solutions, accessories and extended warranties.

3.6 Accidental dental injury

We pay 100% of the dental fee guide amount, up to the maximum per accident in your Schedule of Benefits, for treatment by a dentist to repair or replace natural teeth damaged by an accidental dental injury.

Conditions

- The accident must happen while the covered person is covered.
- You or your dentist must tell us about the injury within 90 days of the accident.
- Treatment must start within 90 days of the accident and be completed within 12 months of the accident.
- The covered person must be covered when the treatment is received.
- Claims must be submitted under this benefit before the dental benefit. Any amount this benefit does not pay may then be claimed under your dental benefit.

Exclusions

- Damage caused by biting or chewing, including on food or any object;
- Injuries that happen while committing or attempting a criminal offence;
- Injuries that happen while taking part in professional or semi-professional sport;
- Dentures, bridges or other appliances that were not in the mouth at the time of the accident;
- Orthodontic treatment and implants.

3.7 Emergency ambulance

We cover licensed ground or air ambulance transport in your province or territory of residence to the nearest hospital able to provide the emergency care needed. We reimburse the part of the reasonable and customary charge not paid by your government health plan.

We do not pay for non-emergency transport, transfers between facilities, transport home or to a care facility, or transport outside your province or territory of residence.

3.8 Professional services

What is covered

Treatment and assessment by the following health practitioners, after any amount paid by your government health plan:

- Acupuncturist
- Athletic therapist
- Chiropractor
- Chiroprapist or podiatrist
- Registered dietitian
- Registered massage therapist
- Naturopath
- Osteopath (non-physician)
- Physiotherapist

Speech-language pathologist services are covered under the **Complete plan only**, with a separate maximum.

How the maximum works

- **Essential and Plus plans:** one combined annual maximum, shared by all of the practitioners listed above.
- **Complete plan:** a separate annual maximum for each type of practitioner.

Assessments and treatment visits both count toward the maximum. X-rays taken by a chiropractor count toward the chiropractor maximum.

Limitations

- The practitioner must be licensed or registered in the province where the service is provided, where regulation exists.
- We may ask for a referral from a physician or nurse practitioner for massage therapy, or before paying for more than 20 visits to any one type of practitioner in an anniversary year.
- Virtual sessions are covered only if the practitioner is licensed in the covered person's province of residence.

Exclusions

- Products, supplements or equipment sold by a practitioner;
- Services at spas, salons or fitness facilities;
- Missed appointments.

3.9 Mental health services

We cover sessions with the following mental health professionals, up to the per-session and annual maximums in your Schedule of Benefits:

- Registered psychologist
- Registered psychotherapist
- Clinical counsellor registered with a provincial association
- Social worker with a master's degree in social work (MSW) or registered social worker (RSW)
- Registered marriage and family therapist

Virtual sessions are covered if the professional is licensed or registered in the province where the covered person lives. We do not pay for assessments done for education, employment, insurance or legal purposes, including court-ordered assessments.

3.10 Medical equipment and supplies (Plus and Complete plans)

We cover the following items when prescribed by a physician or nurse practitioner (unless stated otherwise), medically necessary and suitable for home use, up to the combined annual maximum in your Schedule of Benefits:

- **Custom-made foot orthotics and orthopaedic shoes:** prescribed by a physician, nurse practitioner, podiatrist or chiropodist; supported by a biomechanical or gait assessment; and dispensed by a podiatrist, chiropodist, pedorthist or orthotist. A sub-limit applies per 24 months.
- **Compression stockings:** up to 2 pairs per anniversary year.
- **Mobility aids:** canes, crutches, walkers and standard wheelchairs.
- **Braces and supports:** rigid or semi-rigid braces for the back, neck or limbs, casts and cervical collars.
- **Prostheses:** standard external prostheses (limbs, eyes), breast prostheses and surgical bras after a mastectomy.
- **Diabetic equipment:** one blood glucose monitor every 48 months, and continuous or flash glucose monitoring sensors and transmitters.

- **Respiratory equipment:** CPAP machines (preauthorization required; one every 60 months), oxygen and oxygen equipment, and nebulizers.
- **Ostomy and catheter supplies.**
- **Hospital beds:** standard models, rental only.
- **Wigs** for hair loss due to a medical condition or treatment: one per lifetime, up to \$300.

Limitations

- Claims must first be submitted to any government program that covers the item, such as the Assistive Devices Program in Ontario.
- Items costing more than \$500 require preauthorization.
- We may choose to pay for rental instead of purchase, or purchase instead of rental, whichever costs less over the expected period of need.
- We reimburse standard models only. If you choose a deluxe model, we pay up to the cost of the standard model.

Exclusions

- Items mainly for comfort or convenience;
- Air conditioners, humidifiers and air purifiers;
- Exercise or fitness equipment;
- Home or vehicle modifications;
- Stock (off-the-shelf) orthotics and footwear, and repairs to orthotics;
- Insulin pumps and pump supplies.

3.11 Hearing aids (Complete plan)

We cover the purchase and repair of hearing aids prescribed by an audiologist or physician, including the first set of batteries, up to the maximum in your Schedule of Benefits. Claims must first be submitted to any government program that covers hearing aids. Preauthorization is required. We do not pay for replacement batteries, hearing tests or extended warranties.

3.12 Home care nursing (Complete plan)

We cover skilled nursing care in the home by a registered nurse (RN) or a registered or licensed practical nurse (RPN or LPN), when ordered by a physician or nurse practitioner. Preauthorization is required. We do not pay for custodial or personal support care, care by a family member, or care available through a government home care program.

3.13 Hospital accommodation (Plus and Complete plans)

We cover the difference between the standard ward rate and the semi-private rate (Plus plan) or the semi-private or private rate (Complete plan, private room up to \$200 per day) for an acute care stay in a hospital in your province or territory of residence.

We do not pay for stays in chronic care, rehabilitation or long-term care units; stays that began before the covered person's effective date; or stays for pregnancy or childbirth during the 12-month waiting period.

3.14 Diagnostic services (Québec residents only; Plus and Complete plans)

When not covered by RAMQ and prescribed by a physician or nurse practitioner, we cover laboratory tests, ultrasounds, MRIs and CT scans performed in a private clinic, up to the annual maximum in your Schedule of Benefits. Please contact us before the test to confirm it is eligible. We do not pay for tests required for employment,

insurance, immigration or travel.

3.15 Virtual care (all plans)

All covered persons have 24/7 access to Veltora Virtual Care by app or phone. Services include nurse advice, consultations with a physician (including prescriptions, where appropriate), and short-term mental health support. There is no claim to submit and use does not count toward any maximum. Virtual care is provided by a third-party provider and may change with 30 days' notice.

SAMPLE

4. General exclusions

These exclusions apply to every benefit in this policy, in addition to the exclusions listed under each benefit. We do not pay for any expense that is:

- Covered, or would be covered, by a government health plan, even if you did not apply, the program has a waiting list, or you chose a provider who does not bill that plan;
- Incurred before a covered person's effective date, or after their coverage ends, even if the service or item was ordered earlier;
- Incurred outside Canada, except dental and vision expenses, which we reimburse as if they were incurred in your home province or territory. This policy does not include travel medical insurance;
- Not medically necessary, or mainly for cosmetic purposes;
- Experimental, or not generally accepted in Canadian medical or dental practice;
- Related to war, insurrection, terrorism or service in the armed forces of any country;
- Related to committing or attempting to commit a criminal offence;
- For services provided by a family member or by someone who lives with the covered person;
- For completing forms or reports, translation, missed appointments, interest or late charges, or delivery and shipping;
- Paid or payable by another insurer or plan, except as provided under Coordination of benefits (Section 5.5);
- For services by a practitioner whose licence is suspended or revoked, or who has opted out of a government health plan that would otherwise have covered the service;
- Covered by workers' compensation, or by motor vehicle accident benefits under an auto insurance policy. For injuries from a motor vehicle accident, you must claim under the auto insurance first; we pay only what it does not cover, to the extent the law allows;
- Listed as an individual exclusion in your Policy Summary.

5. Claims

5.1 How to submit a claim

Many pharmacies, dental offices and health practitioners can bill us directly when you show your Veltora benefits card. If your provider does not bill us directly, pay the provider and submit a claim through your member portal or mobile app, or by emailing the claim form and receipts to claims@veltora.example.

Every claim must include the member ID of the person who received the service, shown on your benefits card. Receipts must be itemized and show:

- The patient's name;
- The provider's name and, where applicable, registration or licence number;
- The date of service;
- The service or item provided and its cost; and
- Proof that the amount was paid in full.

Credit card slips, bank statements and cash register receipts are not accepted on their own. Keep your original receipts for 12 months, as we may ask to see them.

5.2 Claim deadlines

- Claims must be received within 12 months after the date of service.
- After coverage ends, claims for expenses incurred while covered must be received within 60 days after the coverage end date, and still within 12 months of the date of service.

An expense is incurred on the date the service is received or the item is delivered, not the date it was ordered or paid for. Premiums must be paid up to the date an expense is incurred for it to be eligible.

5.3 Preauthorization and pre-treatment estimates

The following need our approval before you receive them:

- Drugs flagged for preauthorization in the drug lookup tool;
- Major dental services, orthodontics, and any dental treatment expected to cost more than \$600 (pre-treatment estimate);
- Medical equipment and supplies costing more than \$500, and CPAP machines;
- Hearing aids;
- Home care nursing.

Forms are available in your member portal or by calling us. We usually make a decision within 10 business days of receiving a complete request.

5.4 How we pay

We pay by direct deposit, or by cheque if you have not given us banking information. We pay either the policyholder or the provider; payment cannot be assigned to anyone else. All amounts are in Canadian dollars. Most claims are processed within 5 business days, and we pay no later than 60 days after we receive satisfactory proof of claim. You will receive an explanation of benefits for each claim.

5.5 Coordination of benefits

If a covered person also has health or dental coverage under another plan (for example, a partner's group benefits at work), we coordinate benefits following the guidelines of the Canadian Life and Health Insurance Association. The order is:

- **For you and your partner:** the plan that covers the person as an employee, member or policyholder pays first. The plan that covers them as a dependent pays second.
- **For dependent children:** the plan of the parent whose birthday (month and day) comes earlier in the calendar year pays first. If both parents have the same birthday, the plan of the parent whose first name comes first alphabetically pays first. Different rules apply to separated or divorced parents; contact us for details.

To claim from the second plan, submit the claim with the first plan's explanation of benefits. The total paid by all plans will not be more than 100% of the eligible expense.

5.6 Overpayments

If we pay more than we should have, we may recover the overpayment by deducting it from future claims or by any other lawful means.

5.7 Fraud

Leaving out, misstating or falsifying information on a claim may be considered fraud. We may deny the claim, recover amounts paid, cancel the policy, and report the matter to law enforcement and regulators.

6. Managing your policy

6.1 Who can make changes

Only the policyholder can change the plan, add or remove covered persons, update payment details, or cancel the policy. Requests must be made in writing through your member portal, by email to help@veltora.example, or through live chat; each of these counts as a written request. Requests made by phone must be confirmed in writing within 10 days, or they will not be processed.

6.2 Premiums

Premiums are payable monthly, in advance, on the billing date shown in your Policy Summary, by pre-authorized debit or credit card. Your premium is based on your plan, coverage type, province or territory of residence, and the policyholder's age band (5-year bands, based on age on the anniversary date). If a payment fails, we may try again before the grace period begins.

6.3 Grace period

If a premium (other than the first) is not paid when due, there is a 31-day grace period during which your coverage continues. We will send you a notice at least 10 days before the grace period ends. If the premium is still unpaid at the end of the grace period, your policy ends at the end of the last period for which premium was paid, and we will not pay claims for expenses incurred during the grace period.

6.4 30-day review period

You may cancel your policy within 30 days of your effective date for a full refund of the premiums paid, less any claims we have paid. No refund is payable if the claims paid are more than the premiums paid.

6.5 Cancelling your policy

You may cancel your policy at any time by making a request as described in Section 6.1. Coverage ends at 11:59 p.m. on the last day of the billing period in which we receive your request (the period you have already paid for), or on a later date you choose. We will email you a confirmation showing your coverage end date.

- Premiums are not refunded for part of a billing period.
- If a premium is collected for a period after your coverage end date, we will refund it.
- You have 60 days after your coverage end date to submit claims for expenses incurred while you were covered (see Section 5.2).

6.6 Reapplying after cancellation

If your policy is cancelled, or ends because premium was not paid, you must wait 12 months from the coverage end date before applying for any Veltora health and dental plan. A new application may require evidence of insurability. On a new policy, waiting periods start again and no benefits used under the previous policy carry over.

6.7 Upgrading to a higher plan

You may ask to upgrade to a higher plan at any time. An upgrade to the Complete plan may require evidence of insurability. An approved upgrade takes effect on your next billing date. Your anniversary date does not change.

- The new plan's reimbursement percentages and maximums apply to expenses incurred on or after the upgrade date.

- For benefits that have a waiting period (major dental, orthodontics, and hospital accommodation for pregnancy or childbirth), you keep the coverage you already had, if any. The added or increased portion of that benefit has a new waiting period that starts on the upgrade date.
- Amounts already reimbursed in the current anniversary year count toward the new plan's annual maximums. Lifetime maximums also carry over.

6.8 Downgrading to a lower plan

You may ask to move to a lower plan once you have been on your current plan for at least 12 consecutive months. An approved downgrade takes effect on your next billing date.

- Amounts already reimbursed in the current anniversary year count toward the lower plan's maximums. If you have already reached or passed a maximum under the lower plan, no further amount is payable for that benefit until your next anniversary year.
- Benefits not included in the lower plan end on the downgrade date, including any orthodontic payments still to come.

6.9 Adding a dependent

You may add a dependent by making a request as described in Section 6.1. We may ask for proof that they qualify.

- **Newborns and newly adopted children** added within 31 days are covered from birth or placement with no evidence of insurability (see Section 2.3).
- **A new partner** added within 60 days of your marriage, or of meeting the definition of partner, is covered from your next billing date with no evidence of insurability.
- Dependents added at any other time may need to provide evidence of insurability, and are covered from the next billing date after we approve them.
- Each dependent's waiting periods start on their own effective date. Your premium changes from the billing date after they are added.

6.10 Removing a dependent

You may remove a dependent at any time by making a request as described in Section 6.1. The removal takes effect on your next billing date, and your premium is adjusted from that date.

- You must tell us within 31 days when a dependent stops qualifying (for example, after a separation). If you tell us later, we refund premiums paid for that dependent for no more than the 31 days before you told us, less any claims paid for them after they stopped qualifying.
- A dependent you remove cannot be added back for 12 months, unless they have a qualifying life event: loss of other health coverage, marriage or a new partner relationship, birth or adoption, or a return to full-time studies.

6.11 Changes we may make

We may change premiums or benefits for all policies of the same plan in your province or territory by giving you at least 30 days' written notice. Your premium also changes when the policyholder moves into a new age band on an anniversary date, when your coverage type changes, or when you move to another province or territory. You must tell us within 31 days if you move. We will never change your premium or benefits because of your individual claims.

7. General provisions

7.1 Entire contract

This policy, your application, your Policy Summary, your Schedule of Benefits, and any endorsements or amendments make up the entire contract. No agent or employee has authority to change the contract or waive any of its terms. You may request a copy of your application at any time.

7.2 Statements and contestability

You must disclose all facts that could affect our decision to issue this policy, add a dependent, or approve a change in coverage. If you misrepresent or fail to disclose such a fact, we may void the coverage, deny claims, or add an individual exclusion that would have applied. We will only rely on statements made in your application or other written evidence of insurability. After coverage has been in force for 2 years, we will not contest it except for fraud or non-payment of premium.

7.3 Misstatement of age or province

If a covered person's age or province of residence was stated incorrectly, we will adjust the premium to what it should have been. If the correct information would have made the person ineligible, their coverage is void and we will refund the premiums paid for them, less claims paid.

7.4 Legal action

Every action or proceeding against us to recover insurance money under this policy must be started within the time allowed by the Insurance Act, Limitations Act or other applicable legislation of the province or territory where you live.

7.5 Assignment

This policy and the benefits under it cannot be assigned or transferred to another person.

7.6 Governing law and currency

This policy is governed by the laws of the province or territory where you live. If any provision conflicts with those laws, it is amended to meet their minimum requirements. All amounts are in Canadian dollars.

7.7 Electronic communications

You agree that we may send notices and documents, including those required by law, electronically, and that electronic signatures are valid and binding.

7.8 Subrogation

If we pay benefits for an expense that someone else is legally responsible for, we have the right to recover that amount from them. If you recover money from that person or their insurer, you must repay the benefits we paid for the same expense, less a reasonable share of your legal costs.

7.9 Privacy

We collect, use and disclose personal information only to administer your policy, assess and pay claims, and as permitted or required by law. Our privacy policy is available in your member portal.

7.10 Complaints

If you are not satisfied with a decision or our service, contact our Customer Care team first. If the matter is not resolved, you may ask for it to be reviewed by our Complaints Officer. If you are still not satisfied, you may contact the OmbudService for Life and Health Insurance (OLHI) or the insurance regulator in your province or territory. Contact details are available in your member portal.

SAMPLE

8. Statutory conditions

The following conditions are summarized from the statutory conditions for accident and sickness insurance that apply by law in the common-law provinces and territories. Where there is any difference, the wording of the applicable legislation applies. For Québec residents, the provisions of the Civil Code of Québec apply.

8.1 The contract

The application, this policy, any document attached to it when issued, and any amendment agreed to in writing after issue make up the entire contract. No agent can change the contract or waive any of its terms.

8.2 Waiver

We are not considered to have waived any condition of this contract unless the waiver is clearly stated in writing and signed by us.

8.3 Copy of application

We will provide a copy of the application to the insured or a claimant on request.

8.4 Material facts

No statement made by the insured at the time of application may be used to defend a claim or void the contract unless it is contained in the application or other written statements or answers provided as evidence of insurability.

8.5 Termination by insured

The insured may terminate this contract at any time by giving written notice. We will refund the excess of premium actually paid over the premium for the time the contract was in force, calculated as set out in Section 6.5.

8.6 Notice and proof of claim

The insured or a claimant must give us written notice of a claim within 30 days of the date the claim arises, and furnish reasonable proof of the claim within 90 days. Failure to do so does not invalidate the claim if the notice or proof is given as soon as reasonably possible, and in no event later than one year from the date of the accident or the date a claim arises, if it is shown that it was not reasonably possible to give it within the time required.

8.7 Insurer to furnish forms

We will furnish forms for proof of claim within 15 days after receiving notice of claim. If the claimant does not receive them within that time, they may submit proof of claim in the form of a written statement of the cause or nature of the accident, sickness or disability giving rise to the claim and of the extent of the loss.

8.8 Rights of examination

As a condition precedent to recovery, the claimant must give us an opportunity to examine the person of the insured when and as often as reasonably required while the claim is pending.

8.9 When money payable

All money payable under this contract, other than benefits for loss of time, will be paid within 60 days after we receive proof of claim.
